

Dear FCC, I am writing to let you know that I am in direct opposition to the NAB's petition 04-160. I subscribe to XM satellite radio. This is something that I pay for and do not like that an outside party is trying to limit the services that I receive. I really enjoy listening to up to the minute news and greatly benefit from the weather and traffic reports that XM provides. In addition, XM offers a wide variety of other channels that I also enjoy listening to. In light of all of these things, I respectfully urge you to reject the NAB's petition 04-160. Please help protect XM's first amendment right to broadcast traffic and weather reports and please protect my right to listen to them.

Sincerely,
Elaine Howells
